

Aim:

Write a program to copy last n characters from file-1 to file-2.

- open a new file "TestDataFile1.txt" in write mode
- write the content onto the file
- close the file
- open an existing file "TestDataFile1.txt" in read mode
- open a new file "TestDataFile2.txt" in write mode
- read the number of characters to copy
- set the cursor position by using fseek()
- copy the content from existing file to new file
- close the files
- open the copied file "TestDataFile2.txt" in read mode
